

Roller shutters

The finishes

The finishes

Aluminium

smart plus

Extruded slats made of solid aluminium give the smart plus its high-quality look.

smart XXL

The identification of the robust smart XXL is the 40 mm height of the slats made of roll-formed aluminium.

Plastic with decorative finish

KS 25 - series

Reliability through robust slat connection. The solid basis for numerous design options.

KS 40 - series

The alternative with 40 mm high slats: striking and straight-lined. But no compromise in technical terms.

Real wood veneer or HPL design

quasar

Roller shutter in design combination with other finishes. The essence: dimensionally stable support material made of high density fibreboard suitable for areas with very high humidity. The decor: real veneer or HPL design by Resopal®.

Real glass 4 mm (toughened safety glass)

quasar reflex

High-quality real glass finish with 50 mm high slats. Unique of 4 mm unbreakable toughened safety glass. The patented spacing protection ensures an always identical gap alignment.

smart plus

Aluminium

- › Straight-lined and striking: extruded slats made of solid aluminium provide the basis for its concise design.
- › Classic and timeless: slat height 25 mm.
- › Absolutely silent: flexible plastic profiles interconnect the single slats free from backlash.
- › High-quality components: end caps made of low-friction polyamide ensure the comfortable operating features of the roller shutter.

Finish

- › Anodised aluminium (E6/C0)
- › Aluminium with stainless steel effect (E2/ES)

Features

- › Various lock options
- › Electrical drive
(further information in our brochure "smart motion")

- 1 Aluminium slat, construction size 25 mm
- 2 Patented connecting profile made of plastic for a silent operation
- 3 Handle profile with integrated end stop damping
- 4 End profile for handle mounting with integrated end stop damping

Suitable for the following guiding modes:

smart XXL

Aluminium

- › Light and solid: slats made of roll-formed aluminium.
- › Vibrant design: slat height 40 mm.
- › Absolutely robust: the strong interlinkage of the slats allow ceiling-high dimensions of widths up to 2400 mm.
- › A true all-rounder: various equipment options turn every roller shutter into your very personal smart XXL.

Finish

Roller shutter:

- › Metallic silver

Guiding and cover profiles:

- › Anodised aluminium (E6/C0)

Features

- › Various lock options
- › Mid handle profile
- › Electrical drive
(further information in our brochure "smart motion")

- 1 Aluminium slat, construction size 40 mm
- 2 Optional mid handle profile
- 3 Handle profile with integrated end stop damping

Suitable for the following guiding modes:

KS 25 - series

ABS plastic with decorative finish

- › Absolutely reliable: the robust interlinkage of the slats stands for longevity even under tough operating conditions.
- › ABS material: recyclable with maximum bending stiffness.
- › Maximum stability: bottom profiles made of real aluminium.
- › Classic and timeless: slat height 25 mm in three surface quality levels.

KS 25 F Slats wrapped with real aluminium

KS 25 Slats with hot stamping foil

KS 25 L Paintable slats

Finish

- KS 25 F** Anodised aluminium (E6/C0)
Aluminium with stainless steel effect (E2/ES)
- KS 25** Anodised aluminium (E6/C0)
Aluminium with stainless steel effect (E2/ES)
White high gloss finished
Black high gloss finished
- KS 25 L** Plain-coloured, paintable

Features

- › Various lock options
- › Mid handle profile
- › Electrical drive
(further information in our brochure "smart motion")

- 1 ABS slat, construction size 25 mm
- 2 Optional mid handle profile
- 3 Handle profile made of real aluminium with integrated end stop damping
- 4 End profile for handle mounting with integrated end stop damping

Suitable for the following guiding modes:

KS 40 - series

ABS plastic with decorative finish

- › Absolutely reliable: the robust interlinkage of the slats stands for longevity even under tough operating conditions.
- › ABS material: recyclable with maximum bending stiffness.
- › Maximum stability: bottom profiles made of real aluminium.
- › Timeless elegance: slat height 40 mm in two surface quality levels.

KS 40 F Slats wrapped with real aluminium

KS 40 L Paintable slats

Finish

- KS 40 F** Anodised aluminium (E6/C0)
Aluminium with stainless steel effect (E2/ES)
- KS 40 L** Plain-coloured, paintable

Features

- › Various lock options
- › Electrical drive
(further information in our brochure "smart motion")

- 1 ABS slat, construction size 40 mm
- 2 Handle profile made of real aluminium with integrated end stop damping

Suitable for the following guiding modes:

quasar

Real wood veneer or HPL design

- › Perfect adaptation: roller shutter in design combination with other furniture elements.
- › True variety: finish with real wood veneer or with HPL design by Resopal®.
- › Clear line: flush look without visible gaps.
- › Really convenient: optional with pre-mounted handle bar made of solid aluminium.

Finish

Roller shutter:

- › Real wood veneer
- › HPL design

Guiding and cover profiles:

- › Anodised aluminium (E6/C0)
- › Aluminium with stainless steel effect (E2/ES)

Features

- › Optional handle

- 1 Support material made of high density fibreboard, construction size 25 mm
- 2 Real wood veneer or HPL design on the visible side
- 3 Counteracting
- 4 Bottom bar with integrated end stop damping
- 5 Optional handle

Suitable for the following guiding modes:

quasar reflex

Real glass 4 mm (toughened safety glass)

- › Absolutely safe: real glass, tempered (toughened safety glass).
- › Authentic material look: 4 mm glass thickness.
- › Always at distance: patented spacing protection of the slats.
- › Comfortable at all times: soft-stop within the handle profile.
- › Well-prepared: single slats can be replaced afterwards.

Finish

Roller shutter:

- › Float glass, satined (frosted)
- › White glass, satined (frosted)
- › Float glass, black lacquered
- › White glass, white lacquered

Guiding and cover profiles:

- › Anodised aluminium (E6/C0)
- › Aluminium with stainless steel effect (E2/ES)

- 1 Real glass slat, construction size 50 mm
- 2 Patented linking and spacing technology ensure an identical gap alignment
- 3 Bottom slat with integrated soft-stop
- 4 Pre-mounted handle profile made of real aluminium

Suitable for the following guiding modes:

Weight compensator fittings by KNOKE: developed for your roller shutter.

A variety of finishes and decors combined with almost universal possible applications turn the roller shutter into a real all-rounder. For an optimum of comfort KNOKE has developed weight compensator fittings which are easy to handle and robust during installation and operation. Due to smart adjustments they can furthermore perfectly be adapted to the respective purpose.

KNOKE Beschlagtechnik: Two decades of innovation “made in Germany”

Quality, customer service and confident cooperation have been on top of the scale of values since the foundation of the company in the year 1993. By means of these principles KNOKE Beschlagtechnik has not only turned into an established service provider for the local furniture industry but has taken a significant step forward by opening up a number of international markets.

Our competence within the treatment of aluminium profiles and glass elements as well as our expertise in the range of assembly technology make us a leading partner for the development of customised solutions worldwide. The successful placement of own products in international markets reinforces our position as a specialised initiator within our branch.

Today more than 20 highly committed employees design and produce roller shutters, furniture fittings and a great deal of pleasure for our customers in over 30 countries.
